

YSI Pro10

Portable pH/ORP & temperature meter

The **YSI Pro10** is a rugged, user-friendly instrument for measuring pH or ORP and temperature. Field cables are compatible with standard pH and ORP sensors. An amplified pH sensor is available for applications in deeper or colder waters.

In addition to its impact-resistant, waterproof handheld display, the Pro10 has features that make field sampling faster and easier.

User-replaceable cables and sensors

Automatic pH buffer recognition

50 data set memory

Pro10 handheld specifications

Size (W x L x D)	8.3 cm x 21.6 cm x 5.7 cm (3.25 in x 8.5 in x 2.25 in)
Weight (with batteries)	475 grams (1.05 lbs)
Power	2 alkaline C-cell batteries providing 400 hours of battery life (without backlight)
Operating temperature	-5 to 55 °C
Storage temperature	-20 to 70 °C
Cable	1-, 4-, 10-, and 30-meter lengths with military-spec connectors
Warranty	3-year instrument; 2-year cable; 1-year sensor
Data memory	50 data sets
Languages	English, Spanish, Portuguese, French
Certifications	RoHS, CE, FCC, IP-67, 1-meter drop test, Assembled in USA

Pro10 sensor specifications (Instrument, sensor, and cable)

	Range	Resolution	Accuracy
Temperature (°C, °F, K)	-5 to 55 °C	0.1 °C	±0.3 °C
pH	0 to 14 pH units	0.01 units	±0.1 units
ORP	-1999 to 1999 mV	0.1 mV	±20 mV
